

ASSESSMENT & OPTIMIZATION FOR YOUR PACKAGING

Optimized, recyclable packaging design

Act now and accept part of your responsibility for a sustainable future. Convince others by favouring innovative, recyclable packaging and significantly extend your influence over your customers purchasing decision.

By making recyclability an integral part of the manufacturing process of your packaging you are not only meeting expectations of retailers and consumers as regards sustainable packaging solutions. You also make sure that materials may be reused as high quality secondary raw material. This manufacturing process helps to save valuable resources.

As a leading supplier of environmental and chemical compliance solutions, we offer you professional assistance in examining and optimizing the recyclability of your packaging to meet the requirements of your customers.

- Packaging material analysis
- Certification
- Individual advice & optimization
- In house workshops

Our service offer, PACK 2 RECYCLE is modular and can be individually tailored to meet your needs. We offer various services for the certification and optimization of your packaging to pave the way for sustainable packaging solutions.

To create an offer we only need samples of your packaging unit(s) and its material specifications. An impartial assessment of the recyclability of your packaging will be carried out by an independent expert in accordance with the Packaging Act.
